---	---	---	---

PROFILE

Mechanical engineer and Senior Supplier Quality Engineer with ~8 years holding suppliers to exacting specifications in regulated, high-precision manufacturing. I manage a network of suppliers and contract manufacturers — domestic and international — from incoming components, tooling, and fixtures through PPAP, first-article inspection, and full manufacturing transfer, keeping partners on aggressive schedules and tight tolerances under ISO 13485 and 21 CFR Part 820. Versed in GD&T and 2D/3D drawing interpretation, grounded in process validation and root-cause problem-solving, and natively bilingual in English and Vietnamese — a natural bridge for managing international supplier factories. Open to onsite collaboration and international travel.

CORE COMPETENCIES

MECHANICAL & DESIGN

- GD&T
- 2D/3D Drawing Interpretation
- CAD (AutoCAD)
- Fixture & Tooling Qualification
- Production-Aid / Fixture Design
- DFM

MANUFACTURING QUALITY

- High-Volume Manufacturing
- Plastics & Injection-Molded Parts
- PPAP
- First Article Inspection
- Dimensional Inspection
- MSA

SUPPLIER & PROCESS

- Supplier / CM Management
- Supplier Audits & GEMBA
- Manufacturing Transfer
- IQ / OQ / PQ
- Process Validation
- ISO 13485 · 21 CFR 820

METHODS & BRIDGE

- Root Cause / Risk Analysis
- Applied Statistics
- Six Sigma
- Bilingual EN / VN
- Cross-Cultural Communication

PROFESSIONAL EXPERIENCE

Medtronic — Cardiac Ablation Solutions

Minneapolis, MN

Senior Supplier Quality Engineer

Jun 2025 – Present

- Manage supplier quality across a network of suppliers and contract manufacturers — domestic and international — holding partners to tight tolerances and aggressive schedules under FDA 21 CFR Part 820 and ISO 13485.
- Led the quality response to a **critical foreign-material investigation** — supplier corrective actions, on-site lab work, and dimensional/tolerance analysis — recognized at the VP level; the catch and quick remediation realized ~\$80K in immediate scrap savings while averting the far larger cost of the defect reaching production.
- Drove the operating unit's **first full product through PPAP**, establishing tight supplier process controls and first-article inspection criteria while managing a contract manufacturer through significant ramp challenges.
- Corrected a tolerance-interval analysis during PPAP review using applied statistics; documented reusable guidance for the team.

Medtronic — Cardiac Ablation Solutions

Minneapolis, MN

Supplier Quality Engineer

Jul 2022 – Jun 2025

- ◇ Contributed as SQE to a cross-functional team on a ~2-year manufacturing transfer that closed all PPAP deliverables and passed the external certification audit with **zero findings**.
- ◇ Coordinated with **international contract manufacturers** (including Asia) across time zones on first-article inspection and a legal manufacturing change; traveled on-site, often on short notice, to support builds, supplier readiness, and design-verification closure.
- ◇ Helped design a transfer strategy that **avoided an estimated ~\$500K** in projected costs by using a business-process approach instead of a costly IT build.
- ◇ Supported a global regulatory launch, releasing 12+ product GTINs through implementation and a legal manufacturing change.

Medtronic

Minneapolis, MN

Quality Engineer — Verification & Validation (Contract)

May 2021 – Jul 2022

- ◇ Performed failure analysis on returned implantable products and developed test methods to validate inspection and analysis procedures.
- ◇ Built and executed qualification protocols and validated measurement instruments for attribute and variable (dimensional) product characteristics.

Merit Medical Systems, Inc.

Houston, TX

Manufacturing Engineer · Engineer Technician IV

Sep 2018 – Dec 2020

- ◇ Qualified new equipment, tooling, and processes (IQ/OQ/PQ) working from engineering drawings and GD&T, per 21 CFR Part 820 and ISO 13485.
- ◇ Designed **fixtures and production-aid devices** that reduced scrap and increased high-volume line productivity.
- ◇ Operated extruders and analyzed plastic resin properties to maintain material quality; held tight tolerances in precision part cutting.

— SELECTED RECOGNITION

★ LEADERSHIP

"Exceptional collaboration and leadership in resolving a critical quality issue — going above and beyond to safeguard patient outcomes."

VP, Quality

★ SUPPLIER PARTNERSHIP

"Your leadership in the daily build and validation meetings kept the team accountable and taught the supplier better ways of working — delivering faster results."

Senior Engineering Manager

★ CROSS-CULTURAL

"Thank you for leading our team session on your travels in Vietnam and cross-cultural differences — you set a high bar."

Senior Manager

— EDUCATION

University of Houston — B.S., Mechanical Engineering

2016

Coursework in GD&T, CAD, and Design of Machine Elements; senior design project designing and CAD-modeling (AutoCAD) a working device prototype. Passed the Fundamentals of Engineering (FE) exam. Pi Tau Sigma (ME Honor Society); ASME — Event Committee Lead; Vietnamese Student Association.

— CERTIFICATIONS & LANGUAGES

Engineer-in-Training (EIT)

Texas Board of Professional Engineers · 2017

Languages

Vietnamese (native) · English (fluent — read, write, speak)

— COMMUNITY & OUTREACH

Volunteers with multiple organizations, including **Meals from the Heart**, packing and organizing lunches and meals for people in need. Serves as a **career advisor for high-school students** — including through Medtronic and a regional Chamber of Commerce career program — mentoring students on the professional expectations of a corporate career (email, meetings, and responsibilities), reviewing résumés, and offering guidance on degree and field interests based on personal experience.
